

Solenoid valves 2/2-way servo-operated

Type EV220B 15-50

Features

EV220B NC and NO

- For robust industrial application
- For water, steam, oil, compressed air and gases
- Flow range for water: 2.2 to 160 m³/h
- Differential pressure: Up to 16 bar
- Viscosity: Up to 50 cSt
- Ambient temperature: Up to +80°C
- Media temperature from -30°C to +140°C
- Coil enclosure: Up to IP 67
- Thread connections: From G ½ to G 2
- Water hammer damped
- Built in filter for protection of pilot system
- Adjustable closing time available (see page 7)
- Also available with NPT thread. Please contact Danfoss.

Technical data for NC and NO

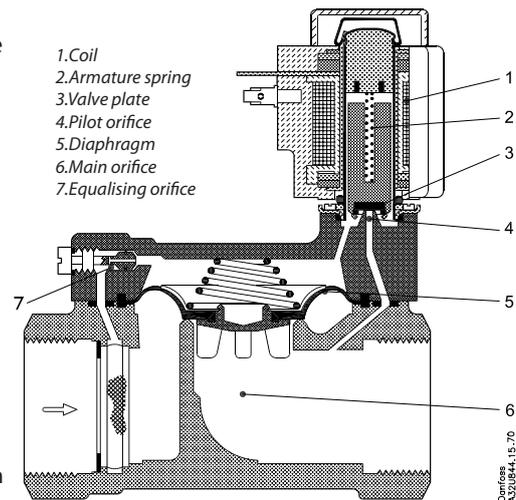

Main type	EV220B 15B	EV220B 20B	EV220B 25B	EV220B 32B	EV220B 40B	EV220B 50B
Installation	Optional, but vertical solenoid system is recommended.					
Pressure range	EPDM/NBR: 0.3 - 16 bar		0.3 - 10 bar for liquids on NO versions			
	FKM: 0.3 - 10 bar					
Max. test pressure	25 bar					
Time to open ¹⁾	40 ms	40 ms	300 ms	1000 ms	1500 ms	5000 ms
Time to close ¹⁾	350 ms	1000 ms	1000 ms	2500 ms	4000 ms	10000 ms
Ambient temperature	Type: BA	9 W ac/15 W dc		Up to + 40°C		
	Type: BB	10 W ac/18 W dc		Up to + 80°C		
	Type: BE	10 W ac/18 W dc (IP67)		Up to + 80°C		
	Type: BG	12 W ac/20 W dc		Up to + 80°C		
	Type: BO	10 W ac/10 W dc		Up to + 40°C		
	Type: BP	16 W dc		Up to + 55°C		
Medium temperature	EPDM:		-30 - + 120°C and +140°C / 4 bar (low pressure steam)			
	FKM:		0 - +100°C and +60°C for water			
	NBR:		-10 - +90°C			
Viscosity	max. 50 cSt					
Materials	Valve body:	Brass..... W.no. 2.0402				
	Armature:	Stainless Steel, W.no. 1.4105/AISI 430 FR				
	Armature tube:	Stainless Steel, W.no. 1.4306/AISI 304 L				
	Armature stop:	Stainless Steel, W.no. 1.4105/AISI 430 FR				
	Springs	Stainless Steel, W.no. 1.4310/AISI 301				
	O-rings:	EPDM, FKM or NBR				
	Valve plate:	EPDM, FKM or NBR				
	Diaphragm:	EPDM, FKM or NBR				

¹⁾ The times are indicative and apply to water. The exact times will depend on the pressure conditions. Closing times can be changed by replacement of the equalising orifice.

Function NC

Coil voltage disconnected (closed):

When the voltage is disconnected, the valve plate (3) is pressed down against the pilot orifice (4) by the armature spring (2). The pressure across the diaphragm (5) is built up via the equalising orifice (7). The diaphragm closes the main orifice (6) as soon as the pressure across the diaphragm is equivalent to the inlet pressure. The valve will be closed for as long as the voltage to the coil is disconnected.

Coil voltage connected (open):

When voltage is applied to the coil (1), the pilot orifice (4) is opened. As the pilot orifice is larger than the equalising orifice (7), the pressure across the diaphragm (5) drops and therefore it is lifted clear of the main orifice (6). The valve is now open for unimpeded flow and will be open for as long as the minimum differential pressure across the valve is maintained, and for as long as there is voltage to the coil.

¹⁾EPDM is suitable for water and steam (steam max. +140° C / 4 bar).

²⁾NBR is suitable for oil, water and air

³⁾FKM is suitable for oil and air. For water at max. +60 °C

⁴⁾Low pressure steam, 4 bar: Max. +140°C

BA ac/dc and BB/BE dc coils: Max. +100°C

BO and BP coils: Max. +90°C

⁵⁾For water: Max. +60°C

BO and BP coils: Max. +90°C

⁶⁾For higher differential pressure than stated, please contact Danfoss.

⁷⁾Approved by Water Regulations Advisory Scheme (WRAS)

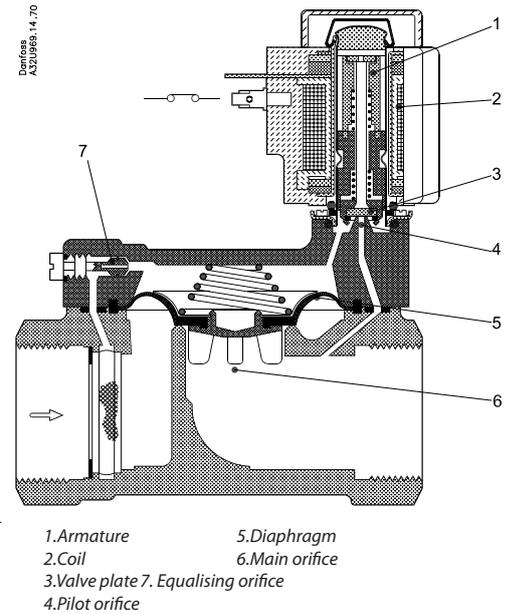

Function NO

Coil voltage disconnected (open):

When the voltage to the coil (2) is disconnected, the pilot orifice (4) is open. As the pilot orifice is larger than the equalising orifice (7), the pressure across the diaphragm (5) drops and therefore it is lifted clear of the main orifice (6). The valve will be open for as long as the minimum differential pressure across the valve is maintained, and for as long as the voltage to the coil is disconnected.

Coil voltage connected (closed):

When voltage is applied to the coil, the valve plate (3) is pressed down against the pilot orifice (4). The pressure across the diaphragm (5) is built up via the equalising orifice (7). The diaphragm closes the main orifice (6) as soon as the pressure across the diaphragm is equivalent to the inlet pressure. The valve will be closed for as long as there is voltage to the coil.

¹⁾EPDM is suitable for water and steam (steam max. +140° C / 4 bar).

²⁾NBR is suitable for oil, water and air

³⁾FKM is suitable for oil and air. For water at max. +60 °C

⁴⁾Low pressure steam, 4 bar: Max. +140°C

BA ac/dc and BB/BE dc coils: Max. +100°C

BO and BP coils: Max. +90°C

⁵⁾For water: Max. +60°C

BO and BP coils: Max. +90°C

⁶⁾For higher differential pressure than stated, please contact Danfoss.

⁷⁾Only 10 bars on liquids

Features

EV220BD for slightly aggressive liquids and gases.

- For robust industrial application
- For neutral and slightly aggressive liquids and gases.
- Contact Danfoss if you are in doubt about the valve's suitability for the medium in question.
- Differential pressure: Up to 16 bar
- Viscosity: Up to 50 cSt
- Ambient temperature: Up to +80°C
- Media temperature: from -30 to +140°C
- Coil enclosure: Up to IP 67
- Thread connections: From G ½ to G 2
- Water hammer damped
- Built in filter for protection of pilot system

Accessories

Manual override unit

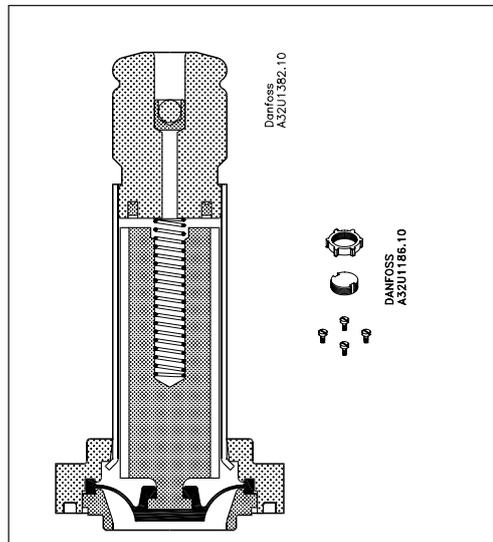

Used for manual override in event of power failure.

Note: Valve height is increased by 16 mm.

Material	Code no.
Brass	032U0150
Stainless steel	032U0149

Isolating diaphragm kit

The isolating diaphragm design ensures that no fluid enters the armature area, which gives the following advantages:

The valve is resistant to aggressive fluids, impurities in the fluid and to calcareous and scale deposits.

The kit consists of assembled isolating unit, O-ring, 4 screws, locking button and nut for the coil.

The kit can be used on all EV220B DN 15-50 and EV210B DN 1.5-3 valves.

Seal material	Code no.
EPDM ¹⁾	042U1009
FKM ²⁾	042U1010

¹⁾EPDM is suitable for water.

²⁾FKM is suitable for oil and air. For water at max.+60°C

Equalizing orifice

The kit comprises an equalizing orifice including O-ring and gasket. The valve's closing time can be changed by installing an equalizing orifice of a size which deviates from the standard valve:

-A shorter closing time is obtained with a larger orifice (the shorter closing time, the greater risk of water hammering)

-A longer closing time is obtained with a smaller orifice.

1) Approved by WRAS.
EPDM is suitable for water and steam (steam max. +140°C / 4 bar)

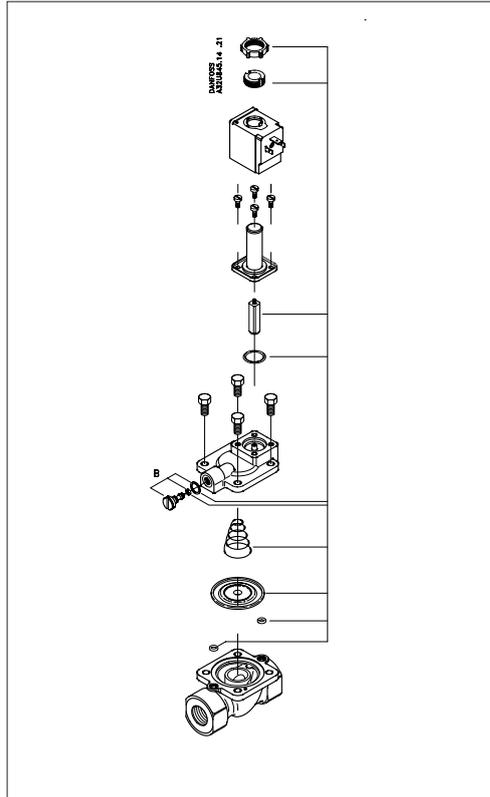

2) FKM is suitable for oil and air.

For water at max. +60°C.

3) NBR is suitable for oil, water and air.

4) Dezincification resistant brass.

Spare parts kit NC

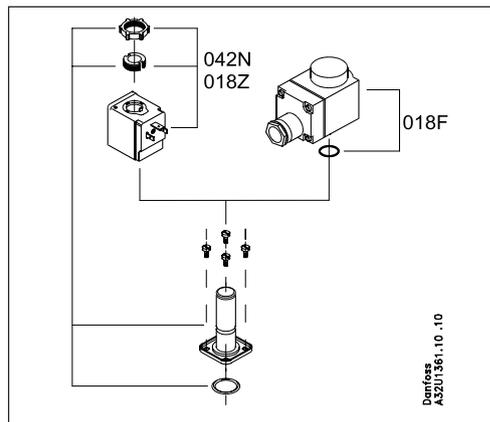

- 1) Approved by WRAS. EPDM is suitable for water and steam (steam max. +140°C / 4 bar).
- 2) FKM is suitable for oil and air. For water at max. +60°C
- 3) NBR is suitable for oil, water and air
- 4) Dezincification resistant brass

The kit comprises a locking button and nut for the coil, armature with valve plate and spring, O-ring for the armature tube, spring and diaphragm, two O-rings for the pilot system, and an O-ring and gas-gasket for the equalising orifice.
