

Solenoid valves 2/2-way direct-operated

Type EV210A

Features

EV210A NC and NO

- Very compact valves for industrial application, such as control and dosage
- For water, oil, compressed air and similar neutral media
- K_v value up to 0.26 m³/h
- Differential pressure: Up to 30 bar
- Viscosity: Up to 20 cSt
- Ambient temperature: Up to +50°C
- Coil enclosure: Up to IP 65
- Thread connections: G 1/8 and G 1/4
- The valves can be used for rough vacuum

Technical data for NC and NO

Installation	Optional, but vertical solenoid system is recommended
Pressure range	0 to 30 bar
Max. test pressure	50 bar
Tightness	Internally: Better than 8.3×10^{-2} mbar l/sec (5 ccm air per min) Externally: Better than 1×10^{-3} mbar l/sec (100% He)
Time to open and close	7 - 10 ms (depending on pressure, coil and viscosity)
Ambient temperature	Max. +50°C
Medium temperature	EPDM: -30 to +120°C FKM: -10 to +100°C
Viscosity	Max. 20 cSt
Materials	Valve body: Brass,..... W.no. 2.0401 Armature: Stainless Steel, W. no. 1.4016/AISI 430 Armature tube: Stainless Steel, W. no. 1.4303/AISI 305 Armature stop: Stainless Steel, W. no. 1.4016/AISI 430 Spring: Stainless Steel, W. no. 1.4310/AISI 301 Valve orifice: Stainless Steel, W. no. 1.4305/AISI 303 O-rings/valve plate: EPDM or FKM

Function NC

- 1. Closing spring
- 2. Armature
- 3. Valve plate
- 4. Valve orifice
- 5. Coil

Coil voltage disconnected (closed):
 When the voltage is disconnected, the armature (2) with the valve plate (3) is pressed down against the valve orifice (4) by the closing spring (1) and the medium's pressure. The valve will be closed for as long as the voltage to the coil is disconnected.

Coil voltage connected (open):
 When voltage is applied to the coil (5), the armature (2) with the valve plate (3) is lifted clear of the valve orifice (4). The valve is now open for unimpeded flow and will be open for as long as there is voltage to the coil.

1) WRAS approved

2) Pressure range can be extended for use in rough vacuum, typically up to 99% vacuum (10 mbar), depending on the application

Function NO

- 1. Coil
- 2. Fixed top
- 3. Opening spring
- 4. Armature
- 5. Pins
- 6. Valve orifice
- 7. Valve plate
- 8. Closing spring

Coil voltage disconnected (open):

When the voltage to the coil is disconnected, the valve orifice (6) is open, the opening spring (3) pressing the valve plate (7) clear of the orifice (6) via the armature (4) and the pins (5). The valve will be open for as long as the supply voltage is disconnected.

Coil voltage connected (closed):

When voltage is applied to the coil, the armature (4) is drawn up to touch the fixed top (2). The valve plate (7) is pressed against the valve orifice (6) by the closing spring (8). The valve will be closed for as long as there is voltage to the coil.

Features

EV210A SS

- Very compact valves for industrial application, such as control
- For neutral and aggressive liquids and gases. Contact Danfoss if you are in doubt about the valve's suitability for the medium in question.
- Differential pressure: Up to 30 bar
- Viscosity: Up to 20 cSt
- Ambient temperature: Up to +50°C
- Coil enclosure: Up to IP 65
- Thread connections: G 1/8 and G 1/4
- The valves can be used for rough vacuum

Spare parts

EV210A NC

The spare parts set comprises the following parts:

- 1) Armature tube
- 2) Armature with valve plate and spring
- 3) Flange
- 4) Disk
- 5) O-ring
- 6) Nut
- 7) 2 screws for connecting tube to valve body

Seal material	Code No.
EPDM	042U0067
FKM	042U0068
